

Airport Manager

Daniel Jílek and Rohan Kumar

Problem Statement

Boston is busy

Logan Airport is one of the busiest in the US, averaging nearly 1000 flights a day

Airports are overwhelmed

With the holidays and the World Cup coming in the future, airports need a dynamic system to manage operations

Smooth travel

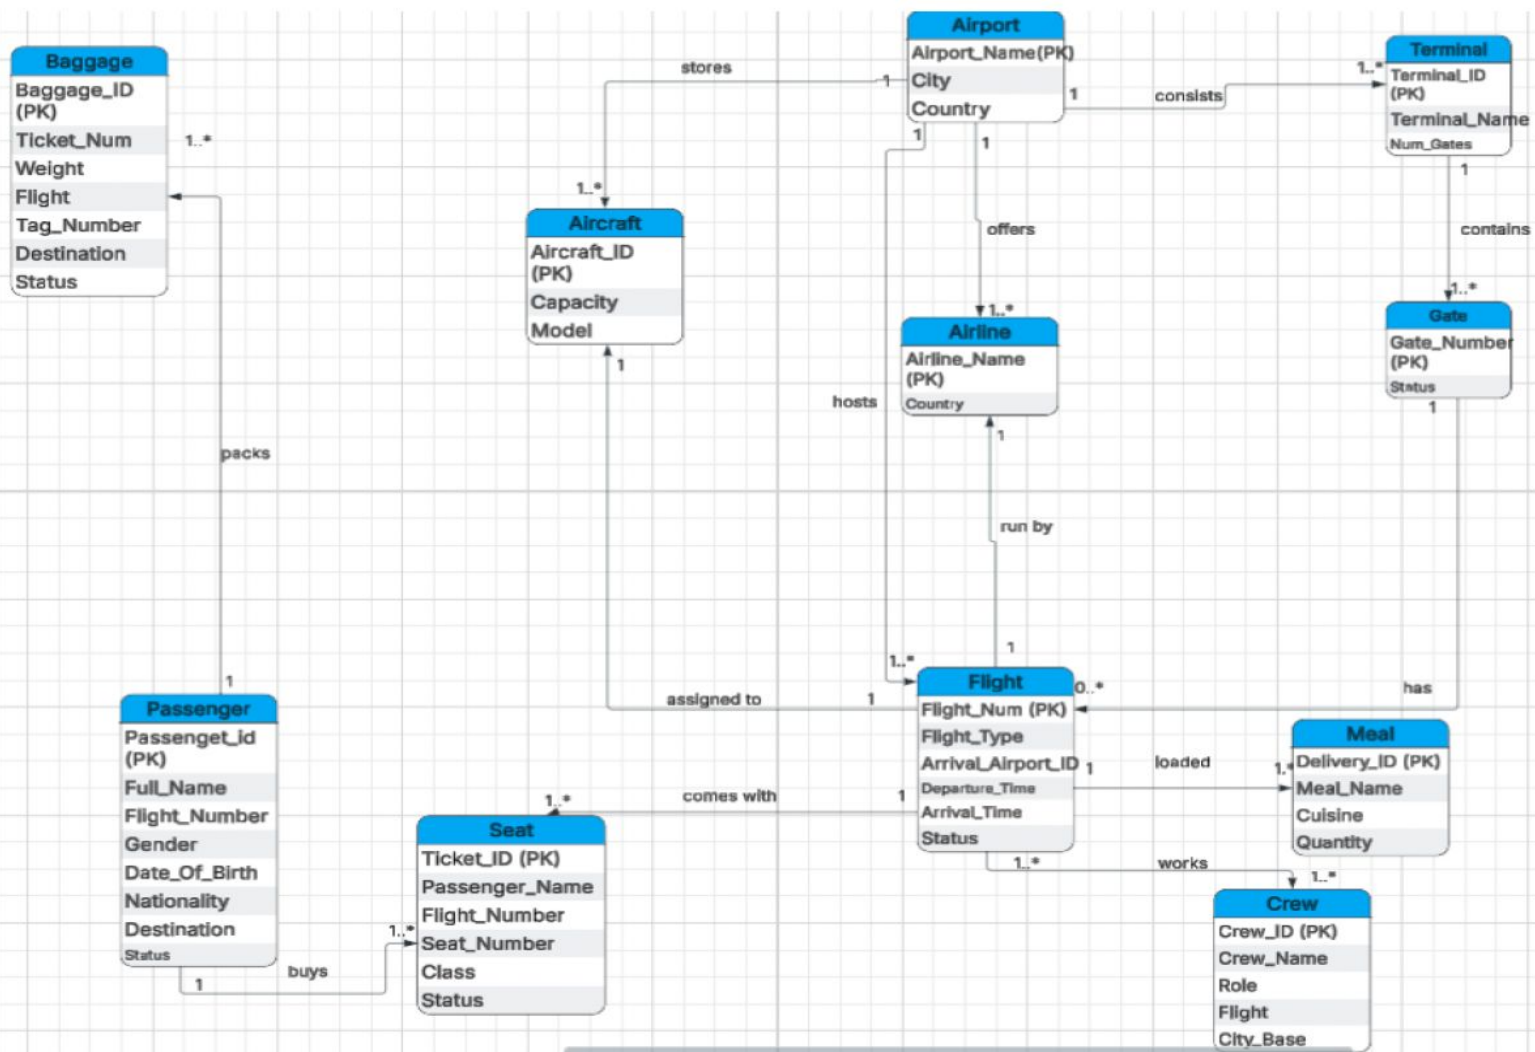

At the end of the day we want a hassle free experience

Airport Management System

Help administrators with the day to day operations of an airport

THE SOLUTION

OVERVIEW

We created an application that has its entire front written in React/Javascript and the backend uses ExpressJS

General features

- CRUD operations to add or remove key entities
- Uses a GUI
- MySQL database

Company Name

Month / Year
